Cameron Calibration Kits:

Do you need a calibration kit? Let us know your requirements and we'll put something together for you to meet your technical needs.

Vendor Information
Calibration • Measurement • Test

Aeroqual:

Aeroqual offers sensor-based instruments and air quality monitoring systems for both indoor and outdoor applications including ozone monitoring and control.

AMETEK STC:

AMETEK Sensors, Test & Calibration is a leading manufacturer and developer of calibration instruments for temperature, pressure and process signals. Crystal Engineering, Mansfield & Green and Jofra Calibration are just some of the world-leading brands manufactured and supplied by AMETEK STC.

Canada Sensors Technology:

Canada Sensors manufacturers advanced "SMART" Pressure and Liquid Level Transmitters that offer HART™ Communication Protocol which are also available in General Purpose and Intrinsically Safe models.

Ebro Electronic:

Ebro® specializes in high-quality measurement technology including; handheld instruments, thermometers and data loggers specialized in measuring temperature, humidity, pH, oil quality and Brix.

Fluke Calibration:

Fluke Calibration instruments and software can be found in standards and calibration laboratories as well as industrial, plant and commercial facilities around the world. Fluke has helped define and grow a unique technology market, providing testing and troubleshooting capabilities that have grown to mission critical status in manufacturing and service industries.

Cameron Calibration Lab:

Cameron Instruments Inc. operates a state-of-the-art ISO 17025 Accredited pressure calibration facility.

- Capabilities up to 30,000psia.
- NIST Traceable Calibrations for Pressure & Temperature.
- Custom calibrations and pressure testing, available upon request.
- Certified Sewerin repair and calibration facility.
- Unbeatable Service & Support.

Vendor Information Calibration • Measurement • Test

Huber Instruments:

Huber develops and produces reference pressure measurement devices including digital manometers for very low pressure measurements.

Machine Products Corporation (MPC):

Manufacturing Visual Flow Indicators, for monitoring the flow of fluid in pipe lines.

Orange Research:

Orange Research is a manufacturer of differential pressure and flow gauges for gas and liquid applications. Used for filtration, steam and back flow applications.

Orange Research

Perma-Cal Industries:

Perma-Cal® Industries, Inc. manufactures and designs Direct Drive pressure Gauges. Perma-Cal® gauges are designed to withstand hostile applications, including intense vibration, shock and over-pressure.

PERMA-CAL®
INDUSTRIES, INC.
(DIRECT DRIVE PRESSURE GAUGES)

Ralston Instruments:

Ralston manufactures and engineers pressure calibration equipment and systems. Their products include hand pumps, compressed gas control devices, hoses, adapters, pressure gauges and recorders, digital thermometers and complete calibration kits.

Sewerin:

Cameron supplies the complete line of Sewerin gas leak detection equipment; gas warning devices, gas leak detectors, gas concentration measuring devices, multigas meters, combination measuring devices, ethane detector and biogas measuring devices.

Cameron Instruments Inc.: For over 25 years Cameron Instruments has been providing solid technical support and customer service with a focus on supplying calibration and test equipment for pressure, temperature and flow applications across Canada. More recently, gas leak detection and Air Quality monitoring have been added to Cameron's offerings.
